Time: SIM Summer 2007 Pre-Conference

# The Course Organizer

Student:
Course Dates: 7-17-07

## ① THIS COURSE:

### GIST: The Basics

**is about** mastering areas of the program needed to help organize and focus instruction by creating a visual approach to planning and presenting information.

## ② COURSE QUESTIONS:

At the end of this course you will be able to answer...

1. How do you access and install the GIST software?
2. What kinds of additional help are available?
3. How do you describe and use the various components of GIST's interface?
4. How do you add a shape?
5. How do you add text?
6. How do you save a document? Where must it always be saved?
7. How do you upload a document to the Library?
